

The perfect gift for all lovers of Skye by Ian Williams

FRESH, VIBRANT and above all HONEST!!
That's the joy of this lovely first book by my friend Ian Williams. Inside, you'll discover a host of watercolour sketches that honestly capture the wildlife of Skye as seen by Ian whilst out in the field gathering inspiration for his various art forms.

Too often we as artists are constrained by the opinion of others, our insecurities censoring work which we have been conditioned to feel is in some way sub-standard, driven to show only our very best, most polished offerings, but sadly in the process, discouraging many people who would just love to draw and splash some paint around, feeling that they could never do what we do! This book, I believe, is an antidote to this all too common condition.

So here you'll find FRESHNESS - dictated by the need to record the moment, no carefully studied lines, but the observed essence captured instantly - something we all could do. VIBRANCY - from swiftly mixed washes, presenting what the heart sees, not what the mind reasons - who cares if the cows are green! And lastly HONESTY - this is Ian, at his 'larger than life', 'take me as you find me' best - each page a hearty slap on the back encouraging us to do the same.
Peter McDermott - Watercolourist
